

**MfPH International Collaborative Summer Program in Nonlinear Differential Equations with Applications  
York University, July 29-August 23, 2024.**

Organizers: Woldegebriel Assefa Woldegerima and Jianhong Wu

The 2024 MfPH International Collaborative Summer Program in Nonlinear Differential Equations will be an integrative program with activities organized in four thematic weeks:  
Nonlinear Delay Differential Equations (July 28-August 3, 2024);  
Multi-scale Differential Equations in Mathematical Biology (August 3-10, 2024);  
Climate Impact on Public Health (August 11-17; 2024);  
Nonlinear Periodic Differential Equations (August 25-29, 2024).

Each thematic week will involve lectures and presentations in the morning, formal group discussions in the afternoon, and informal group discussions and project development during the weekend. Formal lectures and discussions will be held in the MfPH lab seminar room, Kinsmen Building, York University.
